

Central styring af sundheds-IT i Canada og Nordamerikas største sundheds-IT konference

Det foreløbige program ser ud som følger (med forbehold for ændringer):

Toronto:

Torsdag 2. april:

Formiddag: Infoway-Inforoute

Eftermiddag: CHITTA/ITAC

Aften: Soiree på Det danske Konsulat

Fredag 3. april:

Formiddag: Slutbrugere af produkter på hospital

Eftermiddag: Det lokale sundheds-IT administrative/politiske niveau i Toronto

Aften: Afrejse til Chicago.

Chicago:

Lørdag 4. april til og med onsdag 8. april

Det står deltagere på studieturen frit for at vælge fra det overflødighedshorn af indlæg og arrangementer, som HIMSS tilbyder: se www.himssconference.org. Arrangørerne af studieturen har lavet et udkast til indlæg, som fortsætter emnet om IT-governance startet i Toronto.

Forslag til program for HIMSS (IT-governance spor):

Dato	Mulighed 1	Mulighed 2
Lørdag 4. april 2009		
	Besøg til North Shore hospitals	9:30 AM - 10:30 AM The Future of Healthcare: The Quest for Value for All Americans

Dato	Mulighed 1	Mulighed 2
Kl. 11.00 – 12.00	<p>Return on EHR Investment and the Benefits of Implementation: An Update on the Medical Group Management Association's EHR Adoption Report</p> <p>Electronic health records have the potential to improve efficiency, effectiveness and quality of care. However, sufficient due diligence is necessary to fully realize the benefits and avoid the pitfalls of EHR implementation. Gain insights from recent data compiled by the Medical Group Management Association regarding EHR market penetration and attitudes towards using EHR technologies in ambulatory care settings.</p>	<p>Value-driven Health Care: Leveraging Data to Improve Efficiency, Productivity, Quality</p> <p>This session will focus on innovative ways that hospitals and physicians have leveraged data and information to meaningfully impact practice patterns to improve the quality and efficiency of care.</p>
Kl. 12.30 – 14.00	Keynote Dennis Quaid	
Mandag den 6.april 2009		
Kl. 8.30 – 9.30	Keynote George C. Halvorsen	
Kl. 9.45 – 10.45	<p>The Intersection of Healthcare Reform and Health IT</p> <p>As healthcare reform takes center stage in our nation's capital, find out from leading policy experts how this critical national issue is playing out in the new Administration and the 111th Congress. Moderated by a nationally-recognized healthcare collaborative from inside the Beltway, congressional and federal agency policy experts will discuss the leading healthcare reform proposals and how these proposals and future policy initiatives will impact the healthcare and information technology industries. Attendees will have an opportunity to engage in questions and discussion with the panel and understand what role HIMSS members can and will play in these key strategic discussions.</p>	

Dato	Mulighed 1	Mulighed 2
KI. 13.00 – 14.00	<p>Development of an IT Governance Model for a Multi-Hospital Healthcare System</p> <p>Through the Together Project, Eastern Maine Healthcare Systems' (EMHS) created a single unified patient record across seven hospitals in central and northern Maine. Prior to this, each hospital had their own systems and made their own decisions. The Together Project required EMHS to develop and implement an innovative system-wide IT Governance structure and IT Strategic Plan to set priorities for IT at the system level. This new governance model was created in the context of the IT Strategic Plan. This session will present the organization's process, design, results, and critical success factors.</p>	
KI. 14.15 – 15.15	<p>Health Information Exchange: How To Succeed (Perspectives from the Field)</p> <p>Members of an operational, statewide health information exchange including hospitals, a national lab and physician users will discuss the development, implementation and operations of a sustainable HIE, resulting in clinical efficiencies and National Health Information Network participation. DHIN Roundtable members include: Lynn Misener, Applications Manager of Beebe Medical Center; Chris Konen, Project Manager Christiana Care Health System; Ethel Matney, DHIN Project Leader, Bayhealth Medical Center and Edward R. Sobel, DO, Family Practice Associates and Health Care Quality Improvement Program Director, Quality Insights of Delaware.</p>
